

BillOut.

By Outworks

Consolidate and simplify your invoicing to reduce costs, improve revenue, and enhance bill accuracy.

What is BillOut?

Intelligent and simple invoice software.

BillOut is a modern web-based and cloud hosted invoicing software solution. Flexible to fit with your existing infrastructure and built using Microsoft .Net framework, BillOut aggregates your invoicing feeds, merging them to create one concise and accurate invoice.

Created to easily ingest and manage large volumes of consumption-based charges, BillOut is scalable to grow with your business.

Who is BillOut for?

Whatever the headache your current invoicing process is causing, BillOut offers a solution.

Are you a CFO?

- Want to reduce the cost of invoice processing?
- Keen to increase reporting capability?
- Looking to drive profitability & reduce revenue leakage?
- Want customers to pay their invoice on time?

Are you a CIO?

- Fed up with tiresome manual processing?
- Want a smarter solution with increased automation to streamline process & provide confidence in billing accuracy?
- Ready to reduce billing support enquiries?

Are you a Sales Leader?

- Unable to access customer data?
- Frustrated by inability to easily run current and accurate customer profitability reports?
- Want to present a clear and easy to read invoice to your customers?

One Solution. One System.

A flexible and scalable application.

- Available for Cloud or on-premise
- Load charges in any format from any supplier/carrier
- Rate charges from simple to complex and predefined plans and packages
- Generate recurring or one-off charges
- Produce high quantities of invoices on demand
- Use consolidated invoices as a customer touchpoint
- Access and leverage customer, revenue, and profit data
- Fully customisable invoice and report formats

How does BillOut work?

BillOut takes the hard work out of invoicing. By automating and aggregating all your data feeds into the one platform, our intelligent billing engine produces customised invoices that interact with your existing systems. It's smart and simple.

Outworks invoice generation process.

What makes BillOut different?

BillOut delivers a complete, end-to-end billing process that leaves nothing to chance. Tell us your requirements and we'll configure BillOut to deliver exactly what you need.

Transparency

Reduce billing support headaches with advanced transparency across customer usage and costs. Improve your customer relationships by providing clear and simple billing breakdowns.

Accuracy

Replace the risk of human error with automated and accurate invoicing. Save money and gain confidence that your billing is as accurate as can be.

Engagement

Turn your consolidated invoices into a piece of marketing and communicate key messages with your customers.

Flexibility

Start small and scale up as and when you are ready. BillOut is available as a service or inhouse installation.

We'll even manage it for you.

A specialised system requires specialist management.

“Outworks provides the intelligence to our voice billing via their SaaS and supportive bureau services. When it comes to billing, it's always about value for money. As a provider, the Outworks team delivers this value by consistently going the extra mile.”

– BEN LEGGO, GENERAL MANAGER SERVICES & OPERATIONS, TECALA

To ensure you get the most from BillOut, and to allow you to focus on core business, Outworks provides a BillOut billing specialist. Whether you need 4 hours a month or 4 full time staff, we'll equip you with a team of billing analysts to maintain, manage and update BillOut. This might include tasks such as billing runs, maintenance, collections, payment management, carrier accounting, disputing, and more.

About Outworks: The specialists behind the solution.

Outworks also provides consulting services focused on billing systems and processes.

This includes:

- Identifying and preventing revenue leakage to ensure processes support maximum cash flow.
- Re-engineering inefficiencies and eliminating them to ensure timelines are met across your billing cycle.
- Applying quality assurance checks to all feeds and services, verifying rating and charge calculations - and identifying opportunities to strengthen processes.

\$20million
per month

The right solution at the right price.

Whilst pricing can vary depending on billing scope, BillOut operates on a three-price structure. As part of our consultation and planning phase, exact prices will be determined based on scope.

Setup

Your setup fee is a one-off expense as you migrate to BillOut. This includes any infrastructure adjustments or configurations required to ensure system compatibility.

Licence

BillOut's monthly licence is charged as a small percentage of revenue billed out. This means that Outworks only wins when your billing is smoothly run - keeping us focused on monitoring and improving your experience. While you focus on running and growing your business.

Operations

Depending on your management needs, your fee can be based on an hourly rate (for customers who need a couple of days a month) or a monthly service fee based on the number of staff required.

Steps to deployment. It's easy!

Step 1 Contact Outworks.

Step 2 Assess existing systems and processes for preparation and integration.

Step 3 Agree scope, operational support and cost.

Step 4 Begin billing, with ease.
